

# Profile-Line® Twin Plain Tile Vent

## Installation

Determine the location of the position of the Tile Vent on the underlay and cut open the underlay using a star cut the size of the downpipe. After folding back the underlay tabs insert the Vent in through the underlay and fix to the batten, making sure the fixing lug is under the adjacent roof tile. Then proceed with the tiling in the normal manner.

NB. When using for ventilation at high level the vent must not be placed directly under the ridge tile.

Profile-Line® Twin Plain Tile Vent is a neat, cleverly designed in-line vent which is virtually invisible from the ground.

## Product features & benefits

- In-line design makes it unobtrusive on the roof line
- Can be use at high or low levels and for soil ventilation or mechanical extraction when used with a Klober Flexipipe
- Built-in downpipe ensures ventilation path into roof space
- Adaptor and Flexipipe available for soil ventilation or mechanical extraction
- Complies fully with the relevant Building Regulations and British Standards

## Area of application

Suitable for:

- For roofs with a pitch over 22.5°
- Suits Redland Duo Plain, Forticrete Gemini and Marley Ashmore interlocking tiles
- High and low level ventilation

## Material

UPVC

## Colours / Product Codes

Antique red	KG9861-0116
Brown	KG9861-0247
Slate grey	KG9861-0429
Terracotta	KG9861-0152

## Dimensions / Weight (per carton)

273mm long x 330mm wide / 8.3kg

## Packaging

10 pcs per carton

## Related products
