

Universal Insulation Retaining Disk

The KV9980 is an easy to use insulation retaining disc, designed to be used with fibre slab and rigid board insulation. With its unique "pinch to fit" design it reduces stresses put on the wall tie during installation which can often lead to bent or broken wall ties and also makes installation easier as the KV9980 can be installed with one hand.

The KV9980 fits all standard wall ties from 2.5-5mm diameter, flat wall ties and box section up to 9mm. the KV9980 has a larger diameter, increasing the insulation area effectively supported. The pinch fit minimises bent or twisted wall ties.

References

NHBC: Standards 6.1

Product Code
KV9980

Size
Ø85mm x 9mm

Packing
4 bags of 300 per box

Weight
1.812kg per box
100 boxes per pallet (30,000)

Manufacturing Process
Injection moulded

Material
PPC - Polypropylene copolymer

Colours
Black
