

An in-line range suitable for the most popular concrete interlocking roof tiles.

The sleek in-line tile vents have a built-in downpipe provides a direct ventilation path into the roof space, providing upto 10,000mm² of ventilation coverage to help reduce the build-up of mould growth and structural damage, caused by damp, poorly ventilated roofs. The design makes the vent virtually invisible in the roofline and is available in a variety of colours.

Features and benefits

- Specially designed to fit with the market leading, concrete interlocking roof tile profiles.
- In-line design making it virtually invisible on the roofline.
- Design allows direct ventilation to the roof space. Adaptors and Flexipipes are available for easy connection for soil ventilation or mechanical extraction.
