

Discreet eaves ventilation to the roof void.

Over Fascia Vents are perfect for providing discreet eaves ventilation in the roof void. This easily installed unit provides eaves ventilation over the fascia in new build or re-roofing applications.

Features and benefits

- Provides discreet continuous ventilation at eaves level.
- Design incorporates stop section for positioning and is pre holed for ease of installation.
- Robust and durable.
- Protects against birds and insects, whilst allowing airflow into the roof space.

Area of application

- 10mm vent for conventional cold roofs.
- 25mm vent for warm roofs, flat roofs and pitched roofs below 15°.
- Suitable for new build and refurbishment.
