

Options for clay and concrete plain tiles

A discreet in line tile vent range with options for clay and concrete, the plain tile roof vents can help to reduce the build-up of mould growth and structural damage, caused by damp, poorly ventilated roofs. Alternatively, they can be used as a terminal for soil and ventilation pipes and mechanical extraction systems too when used with an adaptor and flexipipe. The uni-plain tile vent is available in 10 colours to suit the most popular roof colours, including Antique Red and Hedgerow Brown.

Features and benefits

- In-line design integrates with plain tiles for a discreet and unobtrusive appearance.
- Can be used as a terminal for soil and ventilation pipes and mechanical extraction systems when used with an adaptor and flexipipe.
