

Designed to provide a mortar free and secure method of fixing concrete interlocking verge tiles.

The Thin Leading Edge dry verge system has been designed to create a sleek, modern finish for thin leading edge concrete tiles. Available in 3 colours, black, grey and brown, this dry verge is easy to install, offering a mechanical fix and maintenance free system and providing weatherproof protection to the verge of the roof.

Features and benefits

- Mortar free meaning it's quicker and easier to install than a traditional verge.
- Weatherproof and maintenance free.
- Its secure mechanical fixing, which complies with BS 8612 and BS 5534, means it's easy to fit with no special tools required.
- Acts as a secondary perimeter fix in accordance with BS 5534.
- Available in three colours.

Area of application

- For roof pitches over 12.5°
- Suitable for most concrete thin leading edge roof tiles with a thickness up to 21 mm.
- Ideal for new build.

Approvals and certifications

- Complies with BS 8612 for performance and BS 5534 for mechanical fixing.
- All products supplied by Klobber Ltd are covered by a 10 year guarantee against manufacturing defect.

Technical guidance

Material	Polypropylene. Batten end clip stainless steel.
Minimum pitch	12.5°
Batten gauge	Max 345mm
Weight per carton	6.1kg
UV Stability	UV Stable
