

Increases the longevity of the roofing membrane at the eaves.

A simple and effective solution to prevent the exposure of the roofing membrane at the eaves, which leads to long-term degradation. The Underlay Support Tray, due to its rigid nature also prevents ponding behind the fascia board.

Features and benefits

- Provides drainage into the gutter, directing water away from the underlay.
- Prevents ponding behind the fascia and the underlay sagging between rafters.
- Easy to install economic replacement for rotting underlay at eaves.
- Protects the underlay from UV degradation.

Area of application

- Suitable for all roofs.
- Suitable for new build and refurbishment.
- Recommended when existing fascia boards are being replaced.
